SWIMMING POOL ACCIDENT ATTORNEYS | ROMANUCCI & BLANDIN

There are numerous swimming pool accidents and deaths related to drowning that occur every year. According to the Centers for Disease Control and Prevention, approximately 10 people die every day from drowning, and 2 out of the 10 are children who are 14 years old or younger. Drowning is the fifth-ranked leading cause of unintentional injury death in our country. The CDC also says that swimming pool accidents that do not result in a fatality can still cause serious injuries, including long-term disabilities like memory problems, learning disabilities and a permanent vegetative state.

Swimming pool owners' or operators' negligence is often the cause of swimming pool accidents. The owners of the pools, including hotels, spas, resorts, homeowners, water parks, schools and public pools, are required to provide a swimming pool that is safe and take precautions against swimming pool accidents.
