WATER CONTAMINATION ATTORNEYS | ROMANUCCI & BLANDIN

Chemicals in the groundwater and substances or objects dumped in oceans, lakes and rivers are all examples of how natural resources are abused, and how the environment can become a place of exposure for people. The Clean Water Act is the primary federal law in the United States to restore and maintain the integrity of waterways, and the Environmental Protection Agency (EPA) has regulatory powers to manage natural resources, but still in many places water pollution persists with a wide variety of chemicals putting people at risk.

Water contamination litigation

Many chemicals are incredibly toxic to our health and are far too common in our communities.

In some cases a group of people, such as employees or neighbors, are exposed to a toxic substance together, which can result in a class action lawsuit. We have experienced toxic tort attorneys who have handled a variety of toxic tort cases, including class action lawsuits for their clients.

An example of a water contamination case is our fight for residents with cancer living near a metal processing plant in Union, Illinois, where evidence shows they had been contaminating groundwater with a multitude of carcinogens for decades. Furthermore, this contamination occurred only feet from a school for 6th to 12th graders.

Environmental attorneys and toxic tort attorneys

The water contamination attorneys at Romanucci & Blandin know the damage in these situations can also include missed work and loss of income, medical bills for treatment and more. The attorneys at Romanucci & Blandin know how to navigate these complex cases and bring justice

to victims, and sometimes settle these cases without going to trial.

With headquarters in Chicago, Romanucci & Blandin approaches a water contamination action as a way to provide monetary compensation and hold a culpable person or institution financially accountable and responsible for the economic, physical and emotional damages that have occurred.

Our law firm has a team of attorneys and staff who have years of experience with environmental litigation. Our team includes partners who guide the process and share their deep knowledge of these types of lawsuits. Each client and each situation is different, and your claim is treated with great care and respect as the team investigates what happened and determines the best path to justice for you.

At Romanucci & Blandin, our water contamination attorneys research the most up-to-date regulatory changes and environmental laws and hire trained and experienced environmental experts to work as expert witnesses and consultants on your cases. We will evaluate your injury and claim and research the relevant statute of limitations applicable to your case. Whether it is to review medical bills and resource laws or know state agencies and governmental agencies and how they operate, we work to locate and utilize the best expert witnesses across the country who are experienced in all the relevant state laws.
